

PANAVISION®

# STREAMLINED

HIGH RESOLUTION

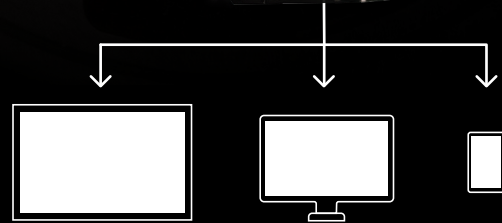

## HOW CAN SHOOTING HIGH RESOLUTION ENHANCE YOUR CREATIVE VISION?

(regardless of your project's destination)

## HIGH RESOLUTION CAPTURE IS NOT ABOUT DISPLAYS

More information at the point of capture enables more flexibility for creative manipulation

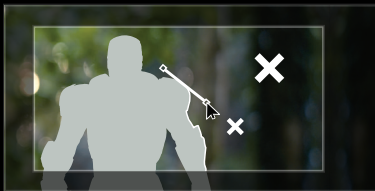

## BY CAPTURING EXTRA RESOLUTION SHOTS CAN BE REFRAMED IN POST

Never lose a great performance because of a missed mark or rogue boom pole

## CAMERA MOVES CAN BE STABILIZED

Thanks to oversize imagery that can easily be cropped to eliminate unwanted shake

## VFX CAN BE INTEGRATED SEAMLESSLY

With precise blends between what was shot and what was crafted as CGI

## WITH THE DXL2'S 8K MONSTRO SENSOR

An image's subtleties are preserved when scaling down to a lower resolution, allowing for finer control over perceived smoothness
